

Aim

To design and develop an Insurance Claim Request Form using Zoho Creator by implementing all thirteen Basic Fields to collect and process claim requests from policyholders.

Objective

1. To understand the usage of Basic Fields in Zoho Creator
2. To build a structured form for insurance claim submission
3. To apply field validations and data collection techniques
4. To create a report for managing submitted claim records

Problem Statement

The insurance office currently handles claim requests manually through paper forms and phone calls, which leads to missing information, delays, and inefficient claim processing.

To overcome this, a digital solution is required to collect complete claim details, validate inputs, and store records systematically for further processing.

Tools Used

- Zoho Creator
- Web Browser (Chrome)

Description of the Application

The application “Insurance Claim Request & Processing Management” is designed to allow users to submit insurance claims through an online form.

The form collects:

- Claimant details
- Contact information
- Policy details
- Incident description
- Claim amount
- Supporting documents

FIELDS USED IN THIS:

S.No	Field Type	Field Name	Purpose	Sample Value
1	Name	Claimant_Name	Captures full name of claimant	Lakshmi Narayanan
2	Email	Email_Address	Captures valid email	lakshmi.n@example.com
3	Address	Residential_Address	Captures full address	7, Temple Street, Tirunelveli, TN, 627001
4	Phone	Contact_Number	Captures mobile number	+91 95000 33445
5	Single Line	Policy_Number	Captures policy number	POL-2024-778812
6	Multi Line	Incident_Description	Captures incident details	Vehicle damaged in accident
7	Number	Claim_Amount_Requested	Captures claim amount	45000
8	Date	Date_Of_Incident	Captures incident date	15-Jul-2026
9	Time	Preferred_Callback_Time	Captures callback time	4:00 PM
10	Drop Down	Claim_Type	Select claim type	Motor Insurance
11	Radio	Claimant_Type	Select claimant type	Policyholder
12	Multi Select	Supporting Documents Available	Select documents	Photographs, FIR Copy
13	Checkbox	Declaration_Of_Authenticity	Confirms data correctness	Checked
