EXPERIMENT 7

Zoho Creator API Integration with CRM

Insurance Claim Request & Processing Management – Zoho Creator

1. Aim

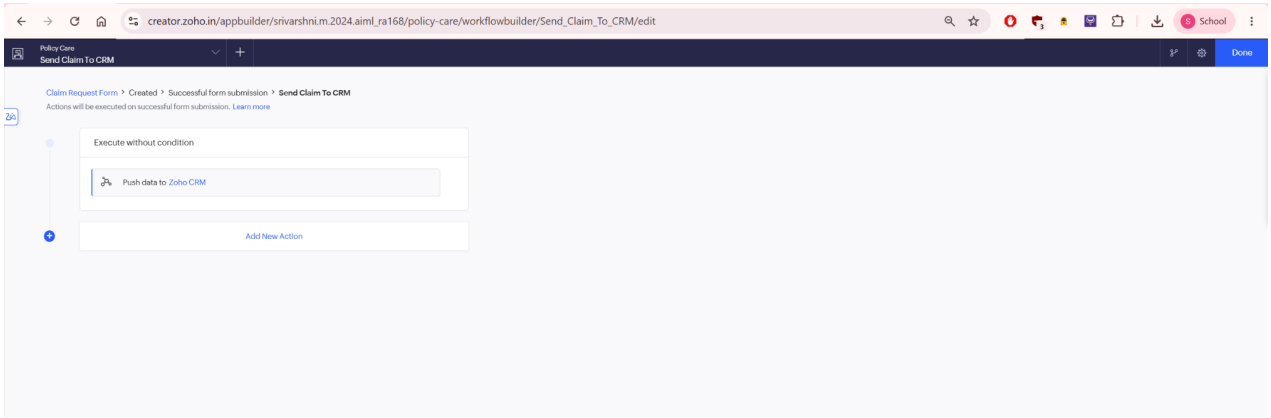

To integrate Zoho Creator with Zoho CRM by configuring a workflow that sends submitted insurance claim request data to the Leads module in Zoho CRM.

2. Procedure

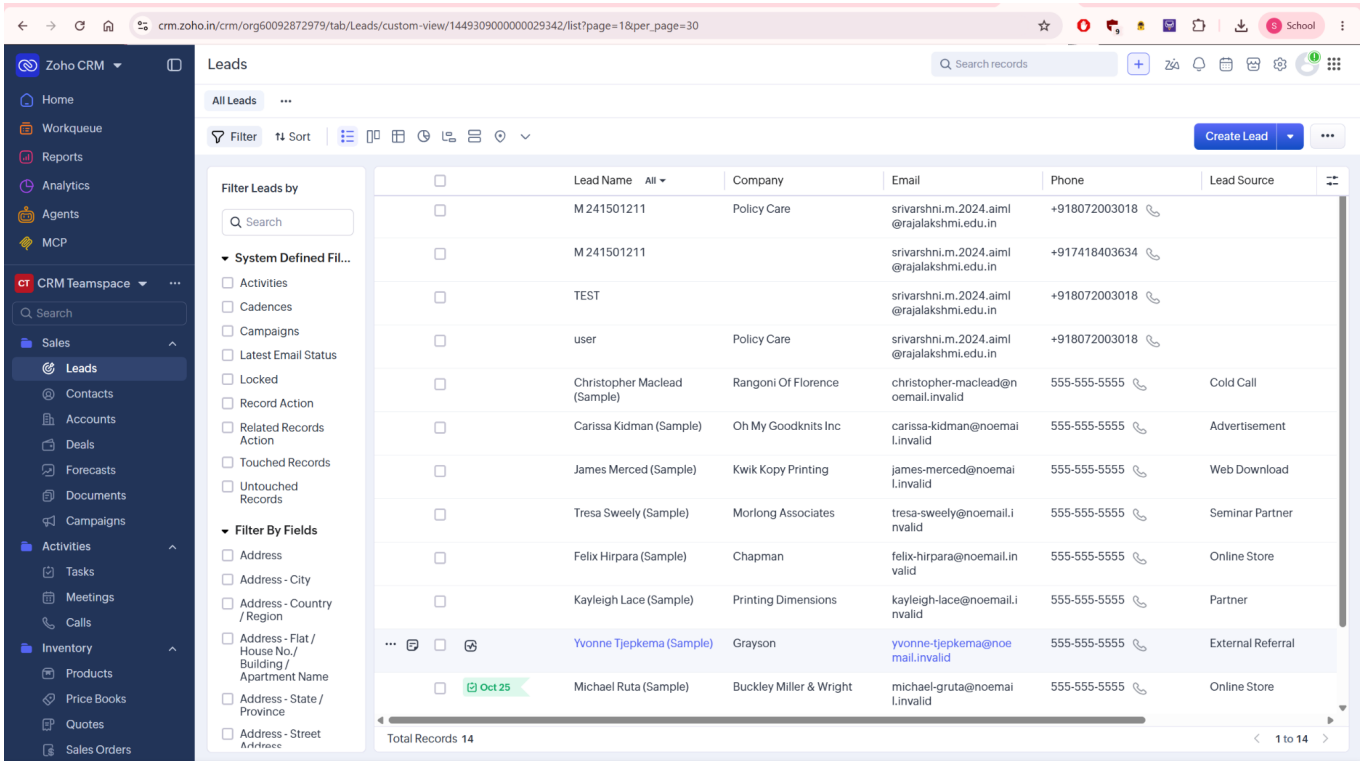

1. Open the Policy Care application in Zoho Creator.
2. Open the Claim Request Form and navigate to the workflow configuration.
3. Under the successful form submission event, create or open the workflow named “Send Claim To CRM”.
4. Add the “Push data to Zoho CRM” action to send form data to Zoho CRM.
5. Configure the destination module and map the required form fields to the corresponding CRM fields.
6. Save the workflow and submit a test claim through the Claim Request Form.
7. Open Zoho CRM and select Sales → Leads to check the lead records and verify the mapped details.

3. Screenshots

Screenshot 1 – Zoho Creator workflow configured to push form data to Zoho CRM.

Screenshot 2 – Zoho CRM Leads module displaying available lead records.

4. Result

The Zoho Creator workflow was configured with the “Push data to Zoho CRM” action, and the Zoho CRM Leads module was opened to inspect the available lead records. The integration workflow setup and its CRM destination were demonstrated.

Note: The screenshots show the workflow action and the CRM Leads page. To confirm a successful transfer for a specific claim, submit a test form and verify that its mapped values appear in the corresponding CRM lead record.
